*The World's Most Transformative Buildings and Urban Planning Projects from over 50 Nations Take Center Stage during The 2025 International Architecture Awards and the Main Global Event 'The City and The World' at the Foot of Acropolis in Athens, Greece this September 19-21*

**CHICAGO, ILLINOIS (SEPTEMBER 1, 2025)** — Now in its 20th year, the International Architecture Awards®, the first and oldest global tributes of their kind, recognize the world's best new 2025 winning design projects, including private homes, religious buildings, schools, airports, transportation centers, museums, skyscrapers, squares, urban parks, bridges, infrastructure, as well as historic restorations and renovations, as an example of today's highest caliber of architectural response to social, cultural, and environmental challenges.

Organized jointly by The Chicago Athenaeum: Museum of Architecture and Design and The European Centre for Architecture Art Design and Urban Studies, The International Architecture Awards have become the world's most prestigious award for new, cutting-edge architecture and urban design.

Established in 2005, the International Architecture Awards are the highest global accolade awarded to buildings and urban planning and landscape architecture projects that demonstrate visionary design thinking, originality, excellence of execution, thereby making a distinct contribution to the general public, and users, the surrounding environment, and urban communities.

"The International Architecture Awards," states Christian Narkiewicz-Laine, architecture critic and president of The

THE INTERNATIONAL ARCHITECTURE AWARDS 2025

Chicago Athenaeum, “celebrate the world's best new architecture and urban planning, no matter its form, size, or budget.”

“Respected by the profession and the public for over 20 years, these awards stand out for their unrivalled judging and global reach.”

“The awards recognize projects that showcase visionary thinking, design excellence, and real social impact that ultimately help make the future a better place.”

“The winning of the Museum’s International Architecture Award signals the highest standards of innovation, sustainability, and a commitment to improving people’s lives through thoughtful design.”

“Irrespective of style, complexity and size of both scheme and budget, successful projects demonstrate visionary or innovative thinking and excellence of execution, continues Narkiewicz-Laine.”

From a short list of over 1,000 submitted projects this year, the jury selected 185 projects deemed as the most superior and distinguished designs, as well as 144 honorable mentions.

Showcasing architectural excellence across five continents, key themes illustrated include:

- **Raffles Hotel and Resort (Saudi Arabia)** by LAVA (Laboratory for Visionary Architecture), in which is built into a mountain top and a large artificial lake built into the sloping typography;
- **Clos du Val Winery (California, USA)** by Surfacedesign, Inc., in which the historic vineyards are restored and expanded the winery’s outdoor tasting spaces to introduce a more ecologically appropriate plant palette;
- **Evroc Data Center, Stone Clouds (Sweden)** by Carl Fredrik Svenstedt Architects, in which massive walls give inertia to stabilize temperatures throughout the seasons, while ensuring security and solidity for these strategic sites;
- **Fifteen Fifteen by Ole Scheeren (Canada)** by Buro Ole Scheeren and PFS Studio, in which a system of vertically shifted apartment modules enable dynamic yet rational and efficient layouts for residential units while the horizontal rotation of these modular elements projects living spaces outwards; and
- **5207 Dundas (Canada)** by Henriquez Partners Architects and Graziani + Corazza Architects Inc., in which two towers emerge from a mid-rise podium, marking the key corners of the site and a tranquil courtyard is framed by the mid-rise podium and creates a quiet refuge from the busy city and adjacent railway.

### **Creative Reinvention, Restoration, and Extension of Existing Architecture**

Examples include:

- **FORT X w Toruniu (Poland)** by Pracownia Reżyserii Architektury Archigeum sp. z o.o., which reinvigorates this history fortress and is integrated with the surrounding landscape located among trees and fields stretching to the horizon;
- **Malmö Stadsteater Hippodromen (Sweden)** by Haworth Tompkins with White Arkitekter and AIX Arkitekter AB, which restores the beloved theater to the life of the city, welcoming audiences and communities into the building that forms the heart of the project;
- **Seddülbahir Fortress (Türkiye)** by KOOP Architects with Arzu Özsvaşıcı Architecture, which was led by a team of architects, engineers, architectural historians, archivists, oral historians, restoration specialists, museologists, and landscape designers to conduct extensive archival, archeological, conservation, restoration, and geodesic research, in collaboration with universities and different government ministries, working for 25 years;
- **The Former Workmen's Dwellings Lower Fort Street (Australia)** by Neeson Murcutt Neille with Tropman & Tropman Architects and Jane Irwin Landscape Architecture, in which the former Workmen's Dwellings now offer fundamental spatial interest in contrast to the now ubiquitous New South Wales Apartment Design Guide room sizes, a richness of material, and the beauty of time and;
- **Brewery Yard, Chippendale (Australia)** by Tzannes with Turf Design Studio, in which the historic Kent Brewery on the former Carlton and United Breweries site has been transformed into a vibrant commercial and retail hub.

### **Outstanding New Skyscrapers and Sky Towers**

- **Citymark Tower (China)** by Kohn Pedersen Fox Associates, PC. (KPF) and Zhubo Design Group Co., Ltd. with AECOM, which its volume tapers off gradually from the bottom upwards and gracefully toward the sky with quintessential straight lines, rigid edges, and corners, and a unique 30-meter-high open tower crown design;
- **The Butterfly + First Baptist Church Complex (Canada)** by Revery Architecture, which celebrates beauty and nature and promotes social connection with a new 57-storey condominium tower with a 7-storey rental residential building and the restoration of one of Vancouver's oldest churches.
- **Shenzhen Transsion Holdings Headquarters (China)** by Aedas and Shenzhen Institute of Building Research Co., Ltd., which encourages personal contemplation, outdoor exploration during breaks, and collaborative brainstorming sessions in shared office spaces; and

- **Wonderwoods (The Netherlands)** by Stefano Boeri Architetti, MVSA Architects BV., INBO, Laura Gatti Studio, and Arcadis Nederland B.V., which is a vertical forest with multilayered urban ecosystem, a safeguard for the biodiversity of living species and especially for the birds that populate the Dutch skies.

### **Spaces For Culture and Community Connectivity Through Design**

- **Azizi Opera House (United Arab Emirates)** by Andrew Bromberg with SAA, which transcends boundaries and explores a realm where architecture seamlessly blends with nature, transforming spectators into performers;

- **Chengdu Science Fiction Museum (China)** by Zaha Hadid Architects and China Southwest Architectural Design and Research Institute Co., Ltd. with Hangzhou Landscape Design Institute, which defines nodes of activity connected by pedestrian routes that extend from the city through the surrounding parkland into the heart of the building; creating a journey of discovery that weaves between indoor and outdoor plazas at multiple levels to link the museum's exhibition galleries, educational facilities, cafes and other amenities.

- **Serralves Foundation Museum Álvaro Siza Wing (Portugal)** by Alvaro Siza Arquitecto, Lda. with João Gomes da Silva, which underscores the close relationship between Serralves and the brilliant architect, spanning over three decades with the realization of significant projects under his authorship,

- **Museum of Istanbul (Türkiye)** by Salon Alper Derinbogaz, which is designed as a structure carved out of a solid mass with its low height relates to the nearby historic walls, while the design incorporates rotation to align with the land wall route and transportation hub.

This year's top winners were selected by a distinguished the jury of designers and academics including:

- **Flavio Manzoni, Senior Vice President Ferrari Design, Ferrari SpA., Italy**
- **Almantas Samalavičius, School of Architecture, Vilnius Gediminas Technical University, Vilnius, Lithuania**
- **Chen-Yu Chiu, Studio Cho, Reyhanli Hatay, Türkiye**
- **Sang Dae Lee, UNITEDLAB Associates LLC., New York/Seoul Korea**

**About The Chicago Athenaeum** ([www.chi-athenaeum.org](http://www.chi-athenaeum.org)) is a global nonprofit education and research institute supported by its members. Its mission is to provide public education about the significance of architecture and design and how those disciplines can have a positive effect on the human environment.

**About The European Centre for Architecture Art Design and Urban Studies** ([www.europeanarch.eu](http://www.europeanarch.eu)) is dedicated to public education concerning all aspects of the built environment - from entire cities to individual buildings - including the philosophical issues of arts and culture that ultimately give the final shape to design. A high emphasis exists on contemporary values and aesthetics, conservation and sustainability, and the theoretical exploration and advancement of art and design as the highest expression of culture and urbanism.
